PATENT APPLICATION

#4

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re the Application of

Yoshikatsu KAMEYAMA et al.

Application No.: 10/076,651

Filed: February 19, 2002

Docket No.: 111785

For: IMAGE FORMING APPARATUS

PRELIMINARY AMENDMENT

Director of the U.S. Patent and Trademark Office
Washington, D. C. 20231

Sir:

Prior to initial examination, please amend the above-identified application as follows:

IN THE SPECIFICATION:

Please replace paragraph [0021] as follows:

[0021] A force F produced by the weight of the upper body 5 acts on the rotational shaft 31. The force F imposed on the rotational shaft 31 acts on the link member 25. A force f is a resultant force of a force f_x , which is produced tangentially with respect to the cam groove 37 by a load of the spring 39 that urges the link member 25 in a specified direction, and a force f_y , which is a resistance acting vertically, generated at a contact point between the cam follower 33 and the cam groove 37. As the link member 25 is urged in a specific direction by the spring 39, the force f acts on the link member 25 via the cam follower 33.
